

Bayerischer Rundfunk Visits Apurano Pharmaceuticals

06.06.2024

At the end of April, we had the pleasure of welcoming the Bayerischer Rundfunk (BR) to our premises and contributing to the latest episode of the BR magazine "Gut zu wissen." As part of a documentary on the opportunities and risks of cannabis, we had the opportunity to present our ongoing clinical studies in the field of chronic pain, DISCOVER.

These studies investigate the therapeutic potential of our investigational product AP707 in various chronic pain indications. In the "Gut zu wissen" segment, Prof. Dr. Dr. Tölle, head of the Center for Interdisciplinary Pain Medicine at the Technical University of Munich and coordinating investigator of the DISCOVER studies, explains the potential advantages of our cannabinoid product AP707 over regular cannabis use and highlights the need for large, scientifically based studies in this area.

Furthermore, the segment shows how we intend to ensure patient safety and data quality using a specially developed study app and digital counting device.

The segment was first broadcast on BR television on June 1, 2024. If you missed the broadcast, you can find it anytime at this [link](#) in the ARD Mediathek.

Enjoy watching!

Your Apurano Pharmaceuticals Team
